## Projects

**Entertainment Tracker  | Github**                                                                 **09/2022**

*A responsive entertainment web app that allows users to browse and search through popular movies and TV Series.*
- Leveraged JavaScript using React and Material-UI to create and style a responsive and interactive Front-end web app
- Implemented Movie Database API to render up to date content and information for popular movies and series.
- Initiated project in Trello using the Agile Development Process to create a MVP

**Event Planner |  Github**                                                                           **10/2022**

*Web app created for event planning that allows users to create and share events as well as joining and keeping track of the guest lists for the events.*
- Constructed web app in Java using Spring to maximize productivity
- Utilized JSP, CSS, and Bootstrap to cultivate styling for the Front-end
- Designed database using MySQL for users to store events and information and guest lists for the events
- Engineered Back-end using OOP practices to better maintain and structure project

## Work Experience

**Atlas Aerospace, LLC | Outside Processing Inspector | Wichita, KS**                    **01/2022 - 06/2022**
- Verified that incoming products were on time and per purchase order, work order, and customer requirements.
- Ensured work orders and purchase orders are filled out completely and that all quantities were correct.
- Inspected all certifications were correct and legible.
- Partnered with product managers to make certain products met on time delivery.

**Faith Church | Worship Director | Valley Center, KS**                                   **10/2021 - 02/2022**
- Led worship during church services and special events.
- Utilized Planning Center to create services and schedule teams.
- Supervised, recruited and managed teams of volunteers.
- Coached, mentored, and developed church musicians.
- Collaborated with the leadership team to plan weekly services and special events

**Ricoh USA | Onsite Technician | Wichita, KS**                                           **12/2018 - 11/2020**
- Achieved expected productivity levels associated with assigned workload and level of experience.
- Prioritized incoming service requests to comply with customer contract response times.
- Managed territory, inventory and customer relationships.
- Performed a full range of servicing and repair service procedures including diagnostics, installation, removal and retrofits on assigned equipment.
- Worked closely with sales partners to maximize equipment leads and upgrade opportunities.
- Interacted with external customers for the purpose of determining service needs on equipment and ensuring overall high level of customer satisfaction with the service performed.
